Foreword

The Quebec Region Statistics and Licensing Division has put together **"Quebec Marine Fisheries: 2006-2007 Highlights"** to provide a general overview of all the Quebec fisheries. This supplement is not intended to replace our Annual Statistical Review, but to be consulted in conjunction with it. We feel that this supplement will provide clients with an easy-to-use, accessible source of information about the main points of interest concerning the industry. Being an overview, it contains only the essentials, and we encourage you to refer to the Annual Statistical Review for more detailed information.

This publication is divided into two parts. The first presents a statistical summary of the main indicators of the fishery workforce and resources. A series of tables shows the changes in catches of the four main species landed in Quebec between 2003 and 2007. To provide a broader picture of the fishing industry, we have incorporated information on all the Atlantic Provinces. The second section outlines the changes in average landings of the largest Quebec fleets for the years 1998 to 2007. Please see p. 93 of the Annual Statistical Review for an explanation of the method used to define the composition of each fleet.

(1) A vessel can be active in more than one maritime sector but it is entered only once within the total for Quebec. The expression "active vessels" designates any vessel having made at least one landing in any particular area.
(2) Fishermen helpers are not entered anymore. In this table, the data related to the St. Lawrence are comprised with Gaspe and North Shore areas.
